AWS, Git, GitHub, Docker, Kubernetes, Terraform, CodePipeline, CloudFormation, SQS, Lambda, EventBridge, Prometheus

Databases:

Relational / Non-Relational - MySQL, PostgreSQL, MongoDB, Redis, Memcached, DynamoDB

EXPERIENCE

EukaPay

Software Engineer

May 2022 – Present

Toronto, Canada (Remote)

- Collaborated with members of my team to build and maintain a cryptocurrency payments processor and an on-ramp/off-ramp platform, contributing to a boost in transaction efficiency and overall project delivery.
- Led the upgrade of the payment processing system to an event-driven architecture, and established asynchronous communication, significantly enhancing application performance and operational efficiency by 90%.
- Directed the development of the Partners platform, accelerating merchant onboarding, and driving product adoption, resulting in over 400% increase in transaction volumes.
- Developed a risk management compliance solution to monitor all transactions on the platform, effectively mitigating Money Laundering and Fraud risks.
- Engineered a secure webhook feature for real-time payment transaction notifications, enhancing merchant integration with the APIs and improving customer satisfaction.
- Implemented a feature for merchants to select a settlement currency and receive payments in multiple currencies, including US Dollars and Euros, facilitating a 50% increase in global adoption.
- Contributed to the creation and documentation of the EukaPay API, allowing seamless third-party interaction with the products programmatically.

Clevadev

Co-founder / Software Engineer

Aug 2021 – Apr 2024

Lagos, Nigeria

- Led a team of 5 developers, and designers in an agile setting to deliver 5 modern and scalable mobile and web applications for global clients, achieving a 95% client satisfaction rate.
- Implemented agile methodologies to optimize the development process, increasing project completion rates and ensuring all client projects were delivered on time.
- Worked closely with clients to gather feedback and requirements, which resulted in a 30% reduction in development time by maintaining clear communication throughout the project lifecycle.

Apex Network

Mobile Developer

Sep 2021 – May 2022

Lagos, Nigeria

- Led the development and maintenance of a cross-platform mobile application for cryptocurrency and gift card trading, which increased user engagement and retention.
- Successfully deployed the mobile application to both the App Store and Google Play Store, achieving over 2000 downloads within the first month.
- Implemented shift-left testing, improving application reliability and reducing bugs by 50%.

Fiverr

Freelance Full-Stack Developer

May 2020 – Jan 2022

Nigeria (Remote)

- Developed and delivered 3 full-stack applications to global clients, resulting in a 98% client satisfaction rate and preserving long-term business relationships.
- Completed more than 30 software development gigs using M.E.R.N stack, Flutter, and Python showcasing versatility and expertise in various tech stacks.
- Achieved Level One Seller status with an average rating of 5 stars.

EDUCATION AND CERTIFICATIONS

Amazon Web Services (AWS)

AWS Certified Developer

Jun 2024
